Section H: Manufacturer's Inventory Report

This section is for the purpose of allowing the assessor to determine the extent of assessment of manufacturers' raw materials, work-in-progress, and finished goods inventories. The portion of the average value of these inventories sold in Arkansas is assessable. The contents of this section must be attested by the appropriate individual or corporate officer and are subject to audit.

Instructions for Completion: Under Arkansas Law, the value of raw materials, work-in -progress, and finished goods inventories are assessed based on the annual average level from the year prior to the year of assessment. (1) The cost basis for raw material value should reflect the sum of acquisition cost, freight, overhead, and any other costs necessary to bring the material to a condition of utility to the owner. (2) The cost basis for work-in progress should reflect the total cost of raw material plus labor, machine time, and any additional overhead or costs necessary to reflect its state as work-in-progress. (3) The cost basis for finished goods should reflect the total cost of raw material plus labor, machine time, and any additional overhead or cost necessary to produce these finished goods. Please note that the LIFO and FIFO inventory cost basis are unacceptable, but the Weighted Average inventory cost basis is appropriate. All supplies which are not consumed and are not considered raw materials are considered taxable in Arkansas.
